# Omni·ID ®

# Don't Limit Your Options.
## Expect More AND Pay Less.

## IQ 150 | IQ 350 | IQ 600

You spoke. We listened. The result is the highest performing, best priced labels in the industry!

- **Designed and tested to work with leading thermal RFID printers**

- **Industry's best performance; balanced read ranges for on/off metal consistency**

- **Widest selection of options for optimal printing, encoding or customization**

- **List priced 20–25% less than competitive products**

More choices, more product options and more printer compatibility are just the beginning. We understand that your applications have different requirements — from read range to size to printing, encoding and even adhesives and over-laminates. We've designed a line of products that not only meet your requirements but raise the bar on what to expect from on-metal labels.

### Smaller labels with 50% more read range per size than comparable competitive products

- Most consistent performance in the industry
- Products offer balanced, consistent performance on or off metal (and near liquid!)

- Designed for flat or curved surfaces
- IP 68 rated
- TAA compliant

## More Product Choices: The Broadest Portfolio of On-Metal Products Available

- Over-laminate options available for extra protection from environmental exposure
- Color printing and custom sizing available to suit your application
- Release liner and ground plane options guarantee consistent, sustainable printing (faster and more reliable than competitive products!)
- Impinj Monza R6-P the standard IC option, and the Monza 4QT a custom option on the IQ 150 and IQ 600, ensure that customers obtain optimal privacy, performance, and memory benefits which address their specific application

*The best part* — *we own the manufacturing process so we boast the most competitive pricing in the market.*

*Bring us a competitive quote for a similar product and we'll beat it!*

## Products and Applications

### IQ 150

Designed with IT assets in mind, this is the narrowest, printable on-metal label available. Its balanced performance and perfect size make it the ideal choice for tracking not only IT assets, but also high-value laboratory and medical equipment.

**Key Product Specifications:** Size 55 × 12.5mm, regional operating frequencies (EU, US), operating temperature −40° to +85°C, IP68 rating, adhesive, printing/pre-encoding and over-laminate options available, 1,000 per roll.*

### IQ 350

With a read range of 3 1/2 meters, this tag has the smallest size to performance ratio. Designed for IT & office asset tracking, it is also ideal where additional read range is needed.

**Key Product Specifications:** Size 50 × 12.5mm, regional operating frequencies, operating temperature −40 to +85C, IP 68 rating, adhesive, printing/pre-encoding and over-laminate options available, 1000 per roll.*

### IQ 600

As a next-generation version of this popular product, the IQ 600 is the most balanced product in the market. Its additional flexibility for curved surfaces makes it perfect for tracking a variety of returnable transit items (RTIs), pipes, cylinders and metal racks for manufacturing, oil & gas, energy and other industrial applications.

**Key Product Specifications:** Size 96 × 24mm, regional frequency (EU, US), operating temperature −20° to +85°C, IP68 rating, adhesive, printing/pre-encoding and over-laminate options available, 500 per roll.*

*\* We always give you MORE — as another benefit, each roll includes an additional 2% oversupply to account for printer setup and testing!*

## You can always expect more from Omni-ID.
